

SERVICES OVERVIEW

Cybersecurity Services

STAY AHEAD OF SOPHISTICATED THREATS

As employees start using their personal devices for work, your business becomes more vulnerable to internal attacks. At NSN Infotech, we believe in taking a comprehensive approach to security. We thoroughly assess your management practices and both internal and external policies to develop the best solution for your needs.

Our Cybersecurity Framework

1. Assess

Our cybersecurity experts will assess your system to identify any security gaps, risks, malpractices, or vulnerabilities. This review helps us understand the current state of your system and provide recommendations to address any issues found.

2. Design

Based on assessments and reports, we will develop a comprehensive cybersecurity policy and strategy, design security controls, and determine appropriate access control mechanisms, and create incident response plans for your business.

3. Implement

Our team will collaborate with you to implement the necessary security measures. This includes deploying and configuring security hardware and software solutions, establishing secure network architectures, and implementing access controls and encryption mechanisms.

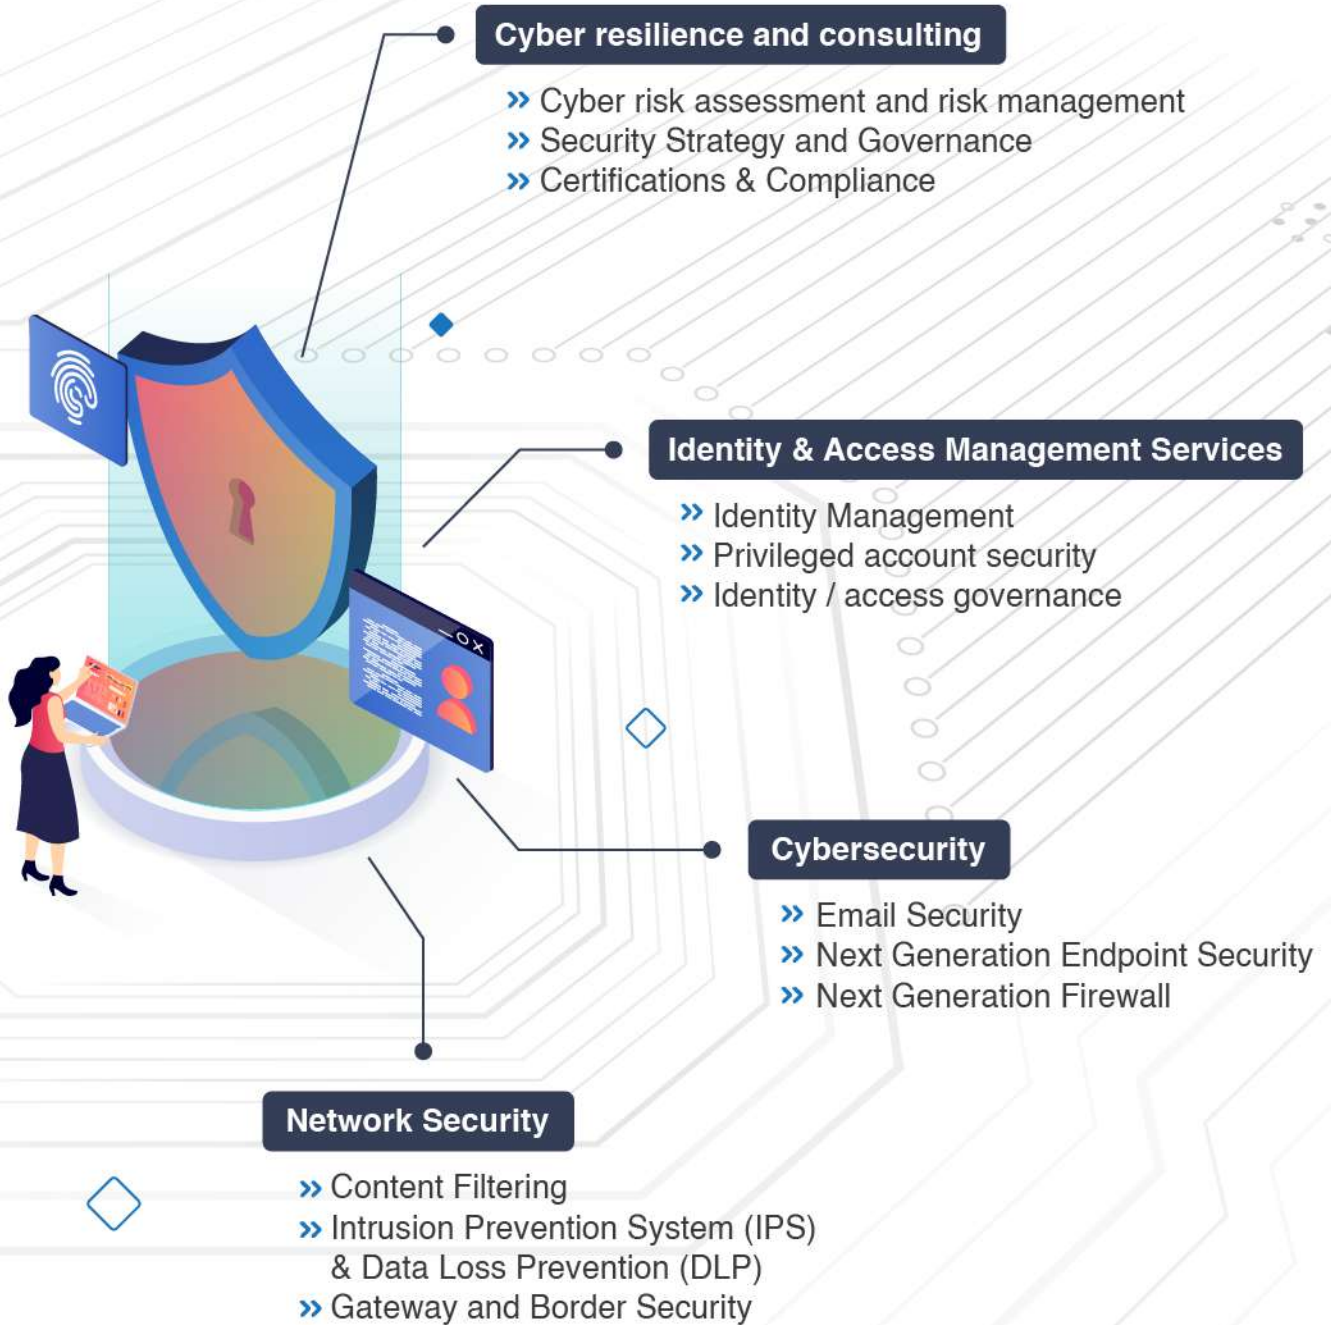

4. Monitor

Our team will actively monitor to detect and respond to potential threats in real-time. We will implement advanced monitoring tools and systems to continuously analyze network and system activities, identifying any suspicious or unauthorized behavior.

5. Maintain

To ensure ongoing protection and resilience, our team will assist you in maintaining your cybersecurity measures. This includes regularly updating and patching security systems and software to address emerging threats and vulnerabilities, routine vulnerability assessments and risk management evaluation.

OUR COMPREHENSIVE CYBERSECURITY SERVICES

CYBER RESILIENCE & CONSULTING

We can assist you in understanding and managing the cyber risks that your business is exposed to. Our team can create a comprehensive set of policies and strategies to ensure that the level of security adopted aligns with your organization's security strategy, business objectives, and regulatory requirements.

SECURITY STRATEGY AND GOVERNANCE

Services Included

Security Strategy Development

Cyber Security Maturity Assessment

Security Policy Development

Security Processes & Procedures Design

Our Security Strategy and Governance services can assist your business in defining and maintaining a Security Management System. This system ensures that the level of security for your business activities and supporting infrastructure aligns with your security strategies, business objectives, and relevant laws and regulations.

Benefits For Your Business

- ✔ Develops a clear strategy that guides all security and assurance efforts.
- ✔ Establishes security requirements to ensure that all activities and solutions are aligned with an approved security policy.
- ✔ Identifies important areas that require security investments, following industry best practices.
- ✔ Defines the organizational structure for everyone involved in preventing, managing, and responding to emergency situations.

CERTIFICATIONS AND COMPLIANCE

Our certification and compliance services help organizations ensure that their services meet regulatory and legal requirements, as well as mandated standards and frameworks. We can assist in writing policies and strategies that ensure compliance with these guidelines.
